

WATER PHASE

Flow & Renewal

Water, source of life and mirror of the soul, flows through our project as a thread that links every experience, every moment of peace and every rejuvenating encounter. Here, the element of water is presented in its purest and most beautifying forms, from natural pools that mimic the sacred cenotes of the region, therapeutic waterfalls that gently massage the skin and spirit, to floating oasis that promise a total disconnection from the daily hustle and bustle, allowing guests to float into a state of deep meditation. The condominiums in this phase will be located near these bodies of water, allowing the element of water to be the center of the relaxation and rejuvenation experience for guests.
